

4.1 Longitudinal joint of ARPANEL panels

Position	Item
1	ARPANEL CH cooling room panel
2	A milled joint in a shape of a female and male flange, removing the linear thermal bridge
3	Sealing mass preventing infiltration of water vapor and air
4	Gap allowing to apply sealing mass that is plastically durable
5	Double-sided shape of the panels joint spot, in a form of a double interlocking system
6	Inclination of the panel's joint surface, facilitating the assembly process
